# Merge Author ID

- Scopus **automatically generates Scopus Author Identifiers** and links to your previous work can sometimes pose **problems** for analysis of citation metrics on your publications **if they are spread over several different identifiers.**
- Each author identifier **will not give the complete picture of your body of work.**
- If your publications in Scopus are spread over several different Scopus Author IDs, you can use the **'Request to merge authors' form.**

# How to *Merge* an **Author's ID** in **SCOPUS**

## Chrome 45 cease support of Scopus Document Download Manager

Document search | **Author search** | Affiliation search | Advanced search | Compare journals

2 . Enter **Author Last Name**  
e.g: Owen

1 . Enter **Author First Name**  
e.g: Rebecca

3 . Click **Search Button**

owen

rebecca

Show exact matches only

Affiliation... e.g. University of Toronto...

ORCID... e.g. 1111-2222-3333-444x

Limit to:

### Subject Areas

Life Sciences

Health Sciences

Physical Sciences

Social Sciences & Humanities

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)

Author last name "owen" , Author first name "rebecca"  Edit
